

BIO AID

Dry Microbial Soil Inoculant

LOT # _____

NET WT _____ #

BIO AID is a diverse blend of naturally occurring nutrient-cycling microorganisms to help enhance and regenerate the biodiversity of the soil and root rhizosphere, improve the accumulation of RAS (root adhering soil) and aid in the storage and release of plant nutrients from the soil.

SUGGESTED USES: Soil apply as a liquid suspension or coated on dry fertilizer granules

RECOMMENDED RATE

Liquid Application: 1 lb per 10 acres, blended with water and/or liquid fertilizer. Requires continual agitation with sufficient water to keep in suspension.

Dry Application: 1 lb per 10 acres applied as a coating on fertilizer granules.

ONE HEAPING SOLO CUP (ENCLOSED) HOLDS 8 oz. – ENOUGH FOR 5 ACRES.

BIO AID is a live microbial product and should be stored in a closed container out of direct sunlight.

BIO AID should be used within the intended growing season.

BIO AID meets National Organic Program requirements for organic production.

BIO AID contains NO Genetically Modified Organisms.

This product is intended for use according to an approved organic system plan.

It is each certified organic grower's responsibility to get approval from his/her certifying agency before using this product. Because of differences among the various certifying agencies, and differences between NOP/EU/JAS/COR ingredient lists, AgriEnergy Resources cannot guarantee that our products will be allowed by your certifier on your farm.

Keep out of reach of children. This product is not intended for human consumption. Wear appropriate mask, goggles and gloves during use to avoid inhalation and contact with eyes and open wounds. Rinse contacted areas with water and wash hands after use. If swallowed, drink water and consult a physician.
